

#MakeWaterSafe

Are you concerned about the health and safety of our water?

We all want safe, contaminant-free water to drink, cook, swim, and bathe in, for the current generations and all of the generations to come. Save the Water wants to make sure that you know what's in your water by opening a laboratory dedicated to testing water for the contaminants that municipal water providers (and bottled water providers!) aren't testing for and for understanding their toxicity.

We need concerned and influential people like you to share your support for Save the Water's effort by sharing our #MakeWaterSafe campaign.

The campaign will kick off on November 14th and will run through to New Year's Eve. During that time, we'll also be participating in:

#GiveMiamiDay on November 17th

#GivingTuesday on November 29th

Throughout the campaign we will be sharing stories about our board and our volunteers, about water contaminants and the communities affected by them, and about our own research plans.

You can:

- **allow your followers to #donate directly from your social media platforms**

<https://goodworld.me/fundraiser/signup>

- **share our tweets and posts between now and New Year's Eve, and encourage your social networks to do the same**

Facebook at [SavetheWaterInc](#)

Twitter at [@savethewater](#)

- **share your thoughts on the issues we'll be talking about by Tweeting, Posting, Sharing, and Retweeting using the [#MakeWaterSafe](#) hashtag**
- **talk to your friends, families, and colleagues about our mission and our campaign**
- **approach the businesses that you work with about sponsorships and gift matching opportunities.**

We're calling on you to extend the reach of our important appeal through your powerful social network. Share your concern and your support for our solution with your followers, partners, friends, and family and ***you'll be helping to advance our shared goal of contaminant-free, healthy water for all.***
