

# RIPPLES OF CHANGE:

Inspiring Action for Clean Water in Marina Bay and Beyond

## A Call for South Florida Volunteers

Prepare for an immersive program focused on achieving **contamination-free, healthy water for all**, where your active participation leads a purpose-driven expedition.

Our initiative begins at the water's edge, involving beach clean-ups, meticulous coastal maintenance, and engaging in water-centric activities aboard yachts and our research vessel. Spanning a wide spectrum of opportunities, our program ranges from prestigious conventions to dynamic University Career Fairs and vibrant fundraisers. Foster meaningful relationships at Volunteer BBQs, meetings, and social gatherings, connecting with like-minded individuals passionate about our cause.

To take action and contribute to a brighter journey towards **clean and healthy water**, contact us at [soflovolunteers@savethewater.org](mailto:soflovolunteers@savethewater.org) for immediate enrollment and inquiries.
